AXXESS Column

AXXESS Column AXXESS Column AXXESS Column AXXESS Column AXXESS Column for Critical Care

Convenience

- Conserves floor space, small footprint
- Accommodates most equipment right at the bedside

Ergonomics

- AXXESS is designed with smooth, Soft contours, allowing for optimized working heights & reach.

Flexibility / Efficiency

- Staff can place equipment where it's needed
- The open center section provides patient visibility from anywhere in the room
- Equipment rails can be added to increase capacity.

Adaptability

- AXXESS is easily reconfigured when demographics or procedures change. "It's not built in"

Expandability

- You choose the position of all outlets, with blanks included for future needs.

Most bedside equipment and accessories can be contained within the unit's small footprint

Utilities connect through ceiling

The AXXESS Column can be placed exactly where it will work best for the staff. With all utility lines fed through the ceiling, placement options are limitless. And expensive structural ceiling supports are not required.

The AXXESS Column allows the care staff to set up the work space in any way they prefer. The slim pedestal perfectly accommodates wheeled IV poles and offers optimal equipment access.

With an ergonomic design which places services within clear & comfortable reach, AXXESS eliminates the congestion of tubes, hoses, & wires close to the patient's head. The clinical staff is free to provide optimal patient care.

The unit is installed on a floor-mounted pedestal

The AXXESS Column works ideally in all intensive care environments – a single column can serve a single patient or up to 4 beds.
